

Parmar Jyotiraditya Kamleshkumar

AI & ML / Generative AI Engineer

23aipar039@ldce.ac.in | +91 93131 73264 | jyotiraditya.is-a.dev | GitHub | LinkedIn

AI/ML Engineer specializing in Generative AI, autonomous agents, and production-ready RAG architectures. Experienced in building multi-agent workflow systems (LangGraph), real-time streaming tools (FastAPI, WebSockets), and high-performance vector databases. Passionate about developer tooling, open-source development, and creating end-to-end data intelligence applications.

EXPERIENCE

Machine Learning Intern

Jun 2024 – Jul 2024

Cognifyz Technologies

Remote

- Implemented supervised and unsupervised ML algorithms (regression, classification, clustering) on real-world datasets, applying grid search hyperparameter tuning and cross-validation to improve baseline accuracy by 14%.
- Built modular ETL data pipelines for data lake ingestion and preprocessing, exposing model inference workflows via robust FastAPI REST endpoints for real-time application consumption.
- Conducted comprehensive statistical analysis and data cleaning on high-dimensional feature spaces, identifying key correlations and reducing input noise to optimize overall training performance.

PROJECTS

LLMBench — LLM Evaluation & Regression Testing Platform

GitHub

FastAPI · Celery · Redis · PostgreSQL · Claude 3.5 Sonnet · Claude Haiku · Plotly.js · GitHub Actions

- Designed a distributed evaluation queue using Celery and Redis to benchmark LLM outputs in parallel, reducing task completion time by **55%**.
- Implemented a Claude-as-a-Judge system scoring responses across 5 qualitative dimensions, lowering evaluation costs by **90%** (to \$0.00036/query) using Claude Haiku.
- Engineered an AI Red Team Auditor and Root Cause Agent to automatically simulate safety bypass attacks and auto-correct prompts, ensuring **98% safety boundary validation**.

LuminateAI — Enterprise RAG & Data Analytics Platform

GitHub

LangGraph · FastAPI · Next.js · ChromaDB · Qdrant · Cohere Rerank · Docker · WebSockets · SQL

- Designed a multi-agent RAG workflow using LangGraph to ingest **10k+ pages** of unstructured documents, generating summaries with **92% retrieval precision**.
- Built a custom hybrid retrieval pipeline (dense semantic + BM25) with Reciprocal Rank Fusion and rerankers, achieving a **95% accuracy rate**.
- Developed a natural language to SQL/pandas analytics dashboard, reducing query generation time by **60% (from 5s to sub-2s)** with WebSocket streaming.

RepoMind — AI-Powered Codebase Explorer & Chat Assistant

GitHub

FastAPI · LangGraph · Qdrant · AST Parsers · OpenAI API · Git · Docker · Python

- Engineered an agentic assistant indexing repositories up to **500k+ LOC**, constructing hierarchical semantic maps via AST parsers and vector indexes.
- Developed an autonomous LangGraph debugging loop generating git patches with a **78% first-pass compiler success rate**.
- Optimized LLM context and implemented a self-correcting sandboxed Docker testing loop, reducing token overhead by **45%** and increasing correctness by **22%**.

macspot — Real-Time Network Discovery Agent

GitHub

Python · Scapy · Ollama · FastAPI · WebSockets · React · SQLite · CVE Database API

- Developed a Scapy network discovery tool scanning **100+ active nodes** in **under 12 seconds** with **99.8% detection reliability**.
- Integrated local LLMs via Ollama to identify hardware vendors and operating systems, achieving **94% classification accuracy**.
- Designed a FastAPI WebSocket streaming UI and SQLite cache, reducing UI rendering lag by **70%** and lookup latency by **80%**.

LEADERSHIP & ACTIVITIES

Placement Coordinator — TPO, LDCE

2024 – Present

- Coordinate campus placement drives, streamline communication between corporate recruiters and 500+ students, and organize mock interviews.

President — Innovator Club, LDCE

2024 – Present

- Lead a 60+ member student club, organizing hands-on AI/ML workshops, hackathons (200+ participants), and technical bootcamps to foster innovation.

TECHNICAL SKILLS

GenAI Stack: LangGraph, LangChain, LlamaIndex, Gemini API, RAG, Ollama, Vector Databases (Qdrant, ChromaDB, FAISS), AST Parsing

Languages: Python, TypeScript, SQL, Java, Go, C++, HTML/CSS

Frameworks: FastAPI, PyTorch, TensorFlow, React, Next.js, TailwindCSS

Tools & DBs: Git, GitHub, Docker, GCP, Azure, Scapy, WebSockets, PostgreSQL, MongoDB, SQLite

EDUCATION

Examination / Degree	University / Board	Institute	Year	CPI / %
B.E. (AI & ML)	GTU	L.D. College of Engineering, Ahmedabad	2023 – 2027	7.92 / 10
